VISION

WHITE
PAPER

NFT Foosball club aims to be an innovative 3D online, cooperative game working with blockchain and leveraging the crypto economy. Players can own their goods and make money while having fun with exchange and trade. It was before, prohibited or even eventually got banned on usual games (for example website to buy digital game currencies): now you can use cryptosystem to make it happen in a secure way. Using NFTs and decentralized protocol is a whole new way of doing games and interactions between players. We want to provide a game platform with multiple ways to earn for players while having an enjoyable gaming experience, in-the-end achieving our goal of long-term player engagement.

ARTISTS WANTED

WHITE
PAPER

If you are an artist interested in the project, apply here with one or two sample pictures. We hold a discord session every two weeks and welcome new artists to participate for the chance to have a mini collection (limited to 10 pieces) and to be included in the smart contract. Places are limited; whoever comes first has the best chance of being included and getting a relaxed introduction to the NFT technology.

Step 2

Are you really passionate about the project? In the beginning, we will release a super exclusive special edition of NFT Foosball tables, limited to 1k; each artist can release a maximum of 3 pieces to be included in the smart contract. The NFT table will be expensive compared to the NFT avatars. More work for you but also more money you can get. Here too, we vote on the submissions in the Discord channel every 4 weeks!

WHITE
PAPER

COINS

WHITE
PAPER

We are currently developing our own currency at full speed. Initially, 20,000 coins will be created and distributed to NFT holders. You will also be able to play against each other for these coins with your NFT avatars connected to the coins. If you still own a Kicker NFT in the future, you will even receive a fee if outsiders play for your coins at a table.

AFFILIATE APPS

35% of the proceeds will be invested in development. The Club determines a part, and the majority will be made by the community in regular votes in the Discord chat. We offer our coins and NFT technologies to all app makers with their foosball app; why reinvent the wheel when there is already a lot out there? We are looking for partner apps. We will contact all apps and see what is possible. With the 35%, we create our own metaverse and are very adept at creating our own app as they want the community to vote for.

Ethereum Exchange:

Ethereum is the fastest blockchain in the world and the fastest growing ecosystem in crypto, with thousands of projects spanning DeFi, NFTs, Web3 and more. Integrate once and never worry about scaling again. Ethereum ensures composability between ecosystem projects by maintaining a single global state as the network scales. Never deal with fragmented Layer 2 systems or sharded chains.

Ethereum's decentralized finance (DeFi) system:

Integration to the Ethereum blockchain, players will be enabled to participate in decentralized finance activities, popularized during 2022, through a unique in-game interface. Players will engage with DeFi instruments (i.e. smart contracts) throughout the financial epicenters in the game. DAO cities are a likely location for the rise of these financial centers, permitting the creators to establish their own fees for trading in their facilities.
